FAMILY CONSTELLATION

SOLUTION ORIENTATED  
 WORKING METHOD

TRUST IN  
 A GOOD SOLUTION

# FAMILY CONSTELLATION

A lot of our problems can be traced back to the unconscious solidarity with our family, a system in that we were born into and which connects us in "blind love" to the fate of our ancestors.

Problems like not really being able to "take on" life,

- that we cannot find a peaceful way with our parents and siblings,
- being unsuccessful or in a difficult relationship,
- the succession of illnesses and illness that occurs repeatedly within the family,

often have got their roots here.

Entanglements mostly have an impact over several generations and prevent us from finding a good place in life. We feel estranged and cut off from our life force and are not able to play our strong role as father or mother and unwillingly repeat the patterns of our parents.

The patterns show up as peculiar – resistant to other methods of therapy.

It is the merit of Systemic therapists like Virginia Satir and Bert Hellinger, who discovered those entanglements, to solve the mechanism of the negative entanglements through family constellation.

The emotional pain, like not to be seen, not heard or even having been abused, is easier worked through in this way and the family history cleared, to become totally free for your own life.

## How I work

The focusing on the solution orientation is especially important for me. A therapeutic "holding" is my request.

For the initial interview I construct a "genogram", in which the family members and the family fate will be sketched.

For the constellation work I need about 60 to 120 minutes, which differs from the short constellation of Bert Hellinger (duration of constellation approximately 15 to 20 minutes).

My most important request is to get as close to a solution as possible. A further attendance is part of my self concept.

In the starting time we work with an additional translator.
